CEI Named to 'Top Women Led Firms' List

Comprehensive Environmental Inc. (CEI) is proud to have been named one of 'The Top 60 Women-Led Companies in NH'.

Published in the October 2013 issues of Business NH Magazine, CEI was the only small civil engineering and environmental consulting firm named to the list. CEI President Eileen Pannetier founded the company in 1987. The firm has grown into an award winning consulting firm with multiple offices serving government, private and nonprofit clients throughout the east coast. One of only a handful of employee owned engineering and environmental firms in the region, CEI is known for its technical excellence and outstanding client services. Having achieved success in a predominantly male industry, CEI's leadership also includes Principal Engineer Rebecca Balke, P.E. and Principal Scientist Stephanie Hanson, both long time employees of the firm.

For more information about CEI, please contact Stephanie Hanson at 603-424-0564 or shanson@ceiengineers.com.
