### CEI Staff Certified in New Sustainable Infrastructure Program

CEI is proud to announce that Kristen Berger, P.E. has received her Envision™ Sustainability Professional Credential issued by the Institute for Sustainable Infrastructure. This program was developed to provide a sustainability rating system for infrastructure projects.

Kristen is trained in the use of Envision™, a tool that is used to choose between economically viable alternatives to achieve the most economic, social, and environmental benefits to a project. An ENV SP works to identify how a project can reach higher levels of achievement in the five ISI credit categories: Quality of Life, Leadership, Resource Allocation, Natural World, and Climate and Risk.

For more information on the use of Envision™ for your next infrastructure project please contact Kristen Berger, P.E. at 508.281.5160 or [kberger@ceiengineers.com](mailto:kberger@ceiengineers.com).
