CEI Selected To Participate in National Pilot Program

Recently, the White House Council on Environmental Quality and the General Services Administration announced that CEI and 51 other small businesses nationwide will participate in the GreenGov Supply Chain Partnership and Small Business Pilot Program. This collaboration between the Federal government and suppliers will promote clean energy and cut waste and pollution in the federal supply chain. CEI will immediately begin participating in the Greenhouse Gas Emissions Inventory Pilot Program where greenhouse gas emissions will be measured and incentive based approaches will be developed. CEI's work on this initiative will help lead the Federal government toward a cleaner, more efficient supply chain and a clean energy economy.
