CEI to Work with City of Nashua on Stormwater Utility Study

CEI was recently selected to work with the City of Nashua, NH to develop a Stormwater Funding Feasibility Study. Cities and towns are facing more stormwater regulations and programs than ever before. Faced with these increased regulatory requirements, communities are now realizing that the biggest impediment is how to pay for the work that is required to remain in compliance and avoid costly fines.

In addition to Stormwater Funding Feasibility Studies, CEI's stormwater funding services include:

- Stormwater Fee/Enterprise Development
- Stormwater Utility Development
- Stormwater Master Planning/CIP
- Rate Studies
- TMDL Review
- Stormwater abatements
- NPDES Compliance Review
- Stormwater Engineering Services
