

CEI Transportation Division Gaining Momentum in Maine

With solid transportation projects now underway with the New Hampshire Department of Transportation (NH DOT) and the Vermont Agency of Transportation (VTrans), CEI was recently certified as a Disadvantaged Business Enterprise by the Maine Department of Transportation. Having provided water resource related consulting to a number of Maine clients over the past decade, we are excited to expand our transportation related services in this state. Current major transportation related projects in the New England area include services relating to utility relocation, roadway and drainage engineering, soundwall design and environmental permitting. Firms interested in working with CEI on MaineDOT projects may contact Matthew Lundsted, P.E., Principal Engineer at 1-800-725-2550 x305 or at mlundsted@ceiengineers.com.
