CEI Paves Way for Transportation Work in CT

Just as 2010 brought the rapid success of CEI's new CT office in New Britain, 2011 brings additional excitement by way of transportation. Having received the green light from the CT Department of Transportation, CEI is now prequalified to perform professional consulting services for ConnDOT. Approved engineering and environmental service areas include Highway Design, Environmental Compliance, Environmental Planning & Studies and Waste Treatment Design. With CEI staff currently providing prime and subcontractual services on various roadway and environmental projects for the MA Department of Transportation and NH Department of Transportation, the firm is now set to provide similar services to ConnDOT. Additionally, CEI has DBE/WBE status with the CT Department of Environmental Protection and MDC and expects similar certification with ConnDOT in the coming months. Firms interested in working with CEI on ConnDOT related projects may contact Sebastian Amenta, P.E., Regional Program Manager at 860-620-3673 or 860-224-0442 samenta@ceiengineers.com.
