

### CEI Joins EPA's Green Power Partnership

In keeping with CEI's commitment to the environment and sustainability, we are now officially part of the U.S. Environmental Protection Agency (EPA) Green Power Partnership. The Green Power Partnership recognizes leading organizations that purchase green power. Green power is electricity generated from

environmentally preferable renewable resources such as solar, wind, geothermal, low-impact biomass, and low-impact hydro resources. CEI purchases Renewable Energy Credits (RECs) to offset over 25% of our electricity use. CEI is proud to be recognized by the U.S. EPA as part of their Green Power Partnership in our efforts to reduce the risk of climate change through the use of green power.

CEI is an engineering and environmental services firm serving the Eastern U.S. For more information on CEI's services or on our participation in EPA's Green Power Partnership, please contact Stephanie Hanson at 800.725.2550 x318 or [shanson@ceiengineers.com](mailto:shanson@ceiengineers.com).
