Has Your Playground Equipment Been Inspected Lately?

With this week being National Playground Safety Week, many communities and schools are looking to address the safety and maintenance of parks and playground equipment. Built for years of fun and enjoyment, parks and playground equipment must be inspected and properly maintained to continue to provide a safe environment for children. CEI's Certified Playground Safety Inspector (CPSI) can help you protect your community and your investment. Certified by the National Recreation and Parks Association, a CPSI is trained to assist in identifying hazards on the playground and playground equipment; rank the hazards according to injury potential; and apply this information to help you eliminate hazard and develop a maintenance and inspection schedule. By having a fully insured CEI CPSI inspect your playground, we can help provide you peace of mind, fulfill insurance requirements and most of all keep your community safe and accident free.

For more information on CEI's playground inspection services, please contact Ms. Jessica Cajigas at 800-725-2550 or jcajigas@ceiengineers.com.
