Mid-Atlantic Stormwater Management

CEI at the CWEA Stormwater Seminar

CEI recently sponsored and attended the Chesapeake Water Environment Association's Spring Stormwater Seminar in Baltimore, Maryland. Held on June 4th 2014, CEI exhibited and attended sessions at this CWEA Stormwater Committee event held at the Maritime Institute of Technology and Graduate Studies (MITAGS).

Topics such as MS4 regulatory compliance success stories, county BMP maintenance programs, green channel inventory protocol, IDDE compliance, stormwater user fees and regional stormwater collaboration were some of the discussion areas. This information exchange forum provided CEI with the opportunity to share recent DoD project experience completed in the Annapolis area with exhibit visitors. This included the completion of infrastructure mapping, IDDE investigation, and stormwater assessment activities at various DoD facilities in Maryland.

For more information on CEI's Mid-Atlantic engineering and environmental consulting services please contact Eileen Pannetier at 800.725.2550 or epannetier@ceiengineers.com.
