
Spring Playground Inspections Underway

A late spring throughout the region may have temporarily postponed outdoor recreational activities but as the season now warms up, CEI's playground inspection services are in full swing. CEI is currently working with communities and schools to address the safety and maintenance of parks and playground equipment, including Westford, MA. With 20 playgrounds throughout town, Westford applied for and received grant funding to implement a playground safety inspection program that CEI completed this month.

Built for years of fun and enjoyment, parks and playground equipment must be inspected and properly maintained to continue to provide a safe environment for children. CEI's Certified Playground Safety Inspector (CPSI) can help you protect your community and your investment. Certified by the National Recreation and Parks Association, CEI staff are trained to assist you in identifying hazards on the playground and equipment; rank the hazards according to injury potential; and apply this information to help you eliminate the hazard and develop a maintenance and inspection schedule. By having a fully insured CEI CPSI inspect your playground, we can help provide you peace of mind, fulfill insurance requirements and most of all keep your community safe and accident free.

For more information on CEI's playground inspection services, please contact Jessica Cajigas at 800-725-2550 or jcajigas@ceiengineers.com.
