## Third Party Landfill Inspections

Did you know that most solid waste management facilities (open and closed) require a third-party inspection to meet regulatory compliance conditions per MassDEP's Solid Waste Management Regulations (310 CMR 19.018)?

Facilities such as active and closed landfills, handling facilities and combustion facilities require these inspections on a regular basis. These range from every two months to every two years depending on the type of facility and status of your operation. Inspections consider a comprehensive set of performance standards that include: waste operations, stormwater and erosion control, security, staffing, recordkeeping, animal control, maintenance along with monitoring and post-closure use for closed facilities.

Third party inspections must be completed by a MassDEP approved individual who meets the minimum qualifications to become Third Party Inspectors (TPIs) pursuant to 310 CMR 19.018. CEI's Manager of Remedial Engineering, Richard Cote, P.E., LSP is a MassDEP approved Third Party Inspector and is qualified to develop and certify inspection reports for agency submittal. In addition to Third Party Inspections CEI can provide LSP, landfill monitoring, sampling and review services.

For more information on CEI's solid waste services and/or Third Party Inspections please contact Rick directly at 508.281.5160 or [rcote@ceiengineers.com](mailto:rcote@ceiengineers.com).
