## CEI Represented at Connecticut's Premier Water Works Event

The Connecticut Section of the American Water Works Association (AWWA) held their 20<sup>th</sup> Annual Technical Conference and Vendor Expo (ATCAVE) on February 23, 2016. This conference is the premier in-state showcase for Connecticut water works professionals. This year's theme was "Water: Our Valuable Resource".

CEI supported this essential event by hosting a booth and participating in a technical education session.

CEI's Kristen Berger, P.E., ENV SP presented on "Responding to Reoccurring Coliform Detections" focusing on a case study recently completed for one New England public water supplier challenged with repeat total coliform detections. This presentation was ideally timed since public water suppliers will be required to comply with the Revised Total Coliform Rule (RTCR) starting April 1, 2016. The RTCR established the requirement for Level 1 and Level 2 Assessments when repeat total coliform positive events occur.

CEI is available to assist public water suppliers in completing these assessments and with resolving total coliform issues. For more information contact, Kristen Berger, P.E., ENV SP at 508-281-5160 or [kberger@ceiengineers.com](mailto:kberger@ceiengineers.com).
