## Drinking Water Source Protection Conference NH DES – 2016

CEI was pleased to be part of the NH Department of Environmental Services (NH DES) Drinking Water Source Protection Conference on May 11, 2016 at the Grappone Conference Center in Concord, NH. CEI Principal Engineer, Benjamin Lundsted, P.E. was an afternoon presenter at this day long conference on the protection of surface and groundwater drinking supplies in NH.

Mr. Lundsted's presentation, *Water Supply Protection in the Pennichuck Brook Watershed*, highlighted the multi-phased program that regional water supplier, Pennichuck Water Works, has implemented with engineering support from CEI within the Pennichuck Brook Watershed. Highlighted activities included on-going water quality monitoring, public education and outreach and the installation of structural Best Management Practices (BMPs) throughout the area.

This event also recognized the outstanding efforts of Pennichuck's Chief Operating Officer, Mr. Donald Ware, P.E., who received the 2016 Source Water Protection Award 'for his outstanding efforts to protect source water within the Nashua region through improved watershed planning, community zoning, stormwater management, land conservation and public education'.

CEI provides comprehensive drinking water and source water protection services throughout the region. For more information on our services or for a copy of the above presentation, please contact CEI Principal Engineer, Benjamin Lundsted, P.E. at 603.429.3584 or at [blundsted@ceiengineers.com](mailto:blundsted@ceiengineers.com).
