## Watershed Protection Videos Now Available For Online Viewing

**July 2016** – the New Hampshire Department of Environmental Protection recently worked with Pennichuck Water Works and Comprehensive Environmental Inc. (CEI) to develop a series of watershed videos focused on source water protection. Funded in part by the NH Source Water Protection Grant Program, this series of short videos was created to show residents what they can do to help prevent water pollution and to highlight key parts of Pennichuck’s watershed protection efforts. The videos represent an alternative public outreach format with broader appeal to fit in with today’s multi-media educational approach. The project included video footage of the Pennichuck Brook Watershed and input from the five watershed communities: Nashua, Merrimack, Amherst, Hollis and Milford. These brief 2-3-½ minute videos highlight potential threats to the Pennichuck watershed and water supply focusing on stormwater, include examples of watershed improvement projects Pennichuck has completed through the years and provides information on what residents can do to help protect the Pennichuck Brook Watershed and water supply. Produced by CEI, each of the four videos (with subtitles) can be viewed at [http://www.pennichuck.com/watershed\\_videos.php](http://www.pennichuck.com/watershed_videos.php).

For more information on this project or CEI’s source water protection capabilities please contact CEI Principal Engineer, Stephanie Hanson at 800.725.2550 or [shanson@ceiengineers.com](mailto:shanson@ceiengineers.com).
