## MA Stream Continuity Program

**Marlborough, MA – August 2016** – During May and June of 2016 CEI worked with the MA Division of Ecological Restoration (DER) on a long term culvert replacement training project to assist municipalities in replacing undersized and unsafe culverts. This project provides classroom and field training to municipal Department of Public Works staff on the design and installation of culverts while considering climate change and meeting the state's Stream Crossing Standards.

CEI assisted DER by providing engineering designs and training support for the replacement of two culverts located in Ashfield and Spencer, MA. Technical information may be found on the DER Stream Continuity Program website at <http://www.mass.gov/eea/agencies/dfg/der/aquatic-habitat-restoration/river-restoration/river-continuity-program.html>

More information on this project can also be found in the May 2016 issue of DER's Ebb & Flow newsletter at the following link: <http://www.mass.gov/eea/agencies/dfg/der/publications/ebbflow-may2016.html#Culvert> or contact CEI Principal Engineer and Project Manager Matthew Lundsted, P.E., CFM at 800.725.2550 or [mlundsted@ceiengineers.com](mailto:mlundsted@ceiengineers.com) for more information about this project and CEI's other culvert, drainage, stormwater and flood management services.
