

CEI Part of Aspiring Leaders Program

CEI is proud to announce our acceptance into the New Hampshire Department of Environmental Services Aspiring Leadership Program. As part of this State of NH Environmental Leadership Initiative, the Aspiring Leaders Program aims to bring together and recognize businesses committed to bringing about a more sustainable NH. By joining this program CEI will take on several long-term projects that demonstrate and track how similar businesses can make a commitment to sustainability, cut costs and reduce their overall environmental impacts.

As a civil engineering and environmental consulting firm, CEI has been recommending and incorporating sustainable design principles into our projects for many years. For more information on this or the services CEI can provide please contact Stephanie Hanson at 800.725.2550 x318 or shanson@ceiengineers.com.
