Wastewater Engineering

CEI Selected for Statewide Wastewater Technical Assistance

CEI was recently selected by the Massachusetts Water Pollution Abatement Trust to provide engineering services to help identify the clean water needs for various communities across the Commonwealth. CEI is in the process of preparing a Clean Watershed Needs Survey for a number of communities including Amesbury, Auburn, Barre, Merrimac, Lanesborough, Lee, Ludlow, North Brookfield and Russell. The prepared survey will help identify the state-wide needs for wastewater, stormwater and nonpoint source projects for the next 20-years. The results of the survey will be used by the Trust to demonstrate the clean water needs in Massachusetts and the need for continued support of several funding programs available to help pay for clean water projects.

For more information on Clean Watershed Needs Surveys, funding programs and CEI's wastewater services please contact Project Manager and Senior Engineer Kristen Berger, P.E. at 508.281.5160 or kberger@ceiengineers.com.
